

Quantum Packages

RAPID DEPLOY

Ultra-Portable 3D & CT Imaging System

The Quantum Rapid Deploy package is our ultra-portable, fully battery-operated 3D and CT imaging system designed for rapid deployment in dynamic environments. Engineered for field professionals who need immediate imaging capability without reliance on external power sources, this system is up and running in minutes. With lightweight components and streamlined setup, it's ideal for EOD teams, forensic investigators, and field-based inspection units who demand mobility without compromising performance. Pack up fast, move with ease, and capture high-resolution data wherever the mission takes you.

IGNITE

Portable 3D & CT Imaging with All-Day Power

The Quantum IGNITE is a high-performance 3D and CT imaging system built for extended operation. Featuring a highly powerful, high volume X-Ray generator, it delivers consistent, high-resolution imaging throughout the day. Simply connect to any standard 110V outlet or portable power pack, and you're up and running in minutes. Designed for demanding field and lab environments where continuous imaging is critical.

- Includes:**
- 17x17 3D X-Ray Detector Panel - Battery
 - Precision Rotator Table - Battery
 - X-Ray Generator - Battery
 - High Powered Laptop
 - Visual Inspect 3D CT Imaging
 - Precision 2D Imaging
 - 2 year system warranty, 1 year batteries

- Includes:**
- 17x17 3D X-Ray Detector Panel
 - Precision Rotator Table
 - X-Ray Generator - High Volume
 - Power Tower Computer/Standard Monitor
 - Visual Inspect 3D CT Imaging
 - Precision 2D Imaging
 - 2 year system warranty, 1 year batteries
