

SmartRayVision - New AI Image Processing

In the Fall 2023, SharpLogixx, LLC, the manufacturer of SmartRayVision, released their latest SRV custom EOD software with new AI enhanced Image Processing.

This new technology takes the SRV images from outstanding to extreme fidelity.

What you now get with AI Image Processing:

Extremely high detail beyond any X-Ray Image produced by any system on the market.

Low pulse count (even 1-Pulse) X-Ray Images are now even more practical.

INFINITE ZOOM: No loss of detail while zooming in or out - no compromise!

The power of SRV AI technology revolutionizes EOD (Explosive Ordnance Disposal) imagery by improving accuracy, speed, and efficiency. The EOD operator will more rapidly analyze complex images to identify the potential threats with more confidence and precision. The new SRV AI technology makes the X-Ray image even more useful in critical identification and render-safe decision-making processes, ultimately contributing to saving lives in high-risk scenarios.
