- 1 meter drop tested
- Indicator light displaying solid connection
- 1 minute to full boot and connection
- 5 Pin standard cable connection (compatible with generator adapter cables)
- Lightweight, less than a pound

*Range can vary based on environment

The TacComm Trigger is designed for operating and firing the X-Ray generator wirelessly at short range.

When paired with the time delay mode in the SRV® Software, standoff distance increases exponentially.

From expedient, tactical operations to X-Raying ordnance in a warehouse, this little trigger is as versatile as it gets.
